Bags

Bamboo Wicker-Handled Small Bag
Model: 13002
This bag is made of around 200 small bamboo twigs held together tightly by a patterned thread. This allows the bag to be laid almost completely flat when empty, but when the base is pushed down its capacity is significantly increased. The depth of the base can be increased from about 7 to 10 cms in this way. Thus the bag can have differing profiles - either slim or triangular - when being carried whilst fastened. The bag is fastened by hooking a string loop with beaded tassels over a large wooden bead on its side, and its handles are made of a rattan twine.
